

November 28, 2018: Announcement : Public Release “Open AntumID” - Open Source project based on DigiByte Digi-ID technology with support services.

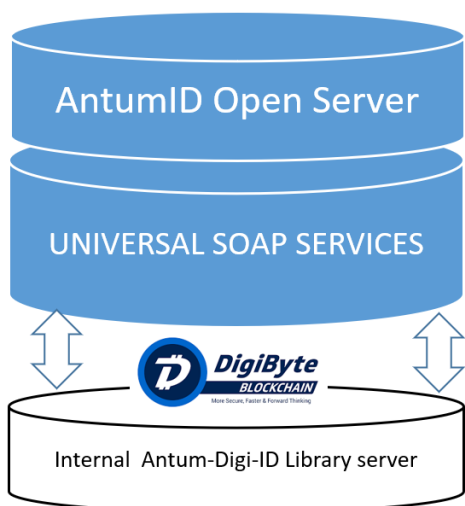

“DigiByte Digi-ID” becomes “Open AntumID”. Open AntumID is the successor to the Digi-ID for the integration part. Through the partnership between Antum and DigiByte and DigiByte Awareness Team (DGBAT) we can offer **complete open source solutions for governments and non-profit organizations**.

In addition to the open source solutions, full commercial solutions are available that provide support and an annual cost as well as transaction costs depending on the service purchased. “Open AntumID” and “Open AntumID SOAP” will ensure that the integration of this technology can happen much faster.

“Open AntumID SOAP” can be used in various programming languages (PHP, .NET, .NET CORE, JAVA, XCODE, etc..) and on various platforms that can use the SOAP protocol. This way Windows applications can be developed without any problems, as well as mobile APP’S, Linux, MAC OS.

## OPEN SOURCE PROJECT “Open AntumID/Open AntumID SOAP”

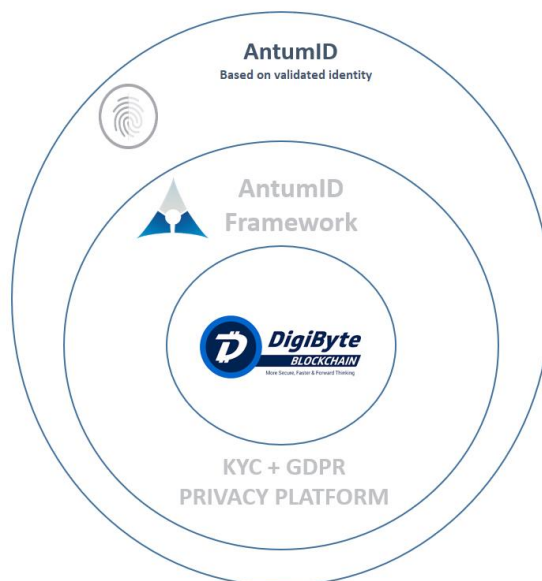

LOGO TO USE

\*With additional support services

## ANTUMID PLATFORM PROJECT Commercial “AntumID”

LOGO TO USE

\*All in one services and solution with support
